04/09/12

1. What properties make a quadrilateral a parallelogram? (lesson 8.3)

1. Opposite sides \parallel
2. Opposite \sphericalangle 's \cong
3. Diagonals bisect
4. One pair of sides are \cong & \parallel
5. Opposite sides are \cong

Geometry

11.1 Area of Triangles and Parallelograms

Standard(s): 3, 4

Vocabulary:

POSTULATES

For Your Notebook

POSTULATE 24 Area of a Square Postulate

The area of a square is the square of the length of its side.

$$A = s^2$$

POSTULATE 25 Area Congruence Postulate

If two polygons are congruent, then they have the same area.

POSTULATE 26 Area Addition Postulate

The area of a region is the sum of the areas of its nonoverlapping parts.

THEOREM

For Your Notebook

THEOREM 11.1 Area of a Rectangle

The area of a rectangle is the product of its base and height.

$$A = bh$$

Justification: Ex. 46, p. 726

THEOREMS

For Your Notebook

THEOREM 11.2 Area of a Parallelogram

The area of a parallelogram is the product of a base and its corresponding height.

Justification: Ex. 42, p. 725

$$A = bh$$

THEOREM 11.3 Area of a Triangle

The area of a triangle is one half the product of a base and its corresponding height.

Justification: Ex. 43, p. 726

$$A = \frac{1}{2}bh$$

Find Area of Polygons

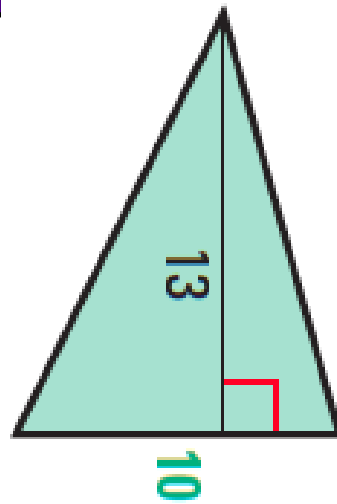

Find the area of the polygon.

$$A = b \cdot h$$

$$A = 14 \cdot 12$$

$$A = 168 \text{ units}^2$$

$$A = \frac{b \cdot h}{2}$$

$$A = \frac{10 \cdot 13}{2}$$

$$A = 65 \text{ units}^2$$

Pythagorean Theorem

The lengths of the hypotenuse and one leg of a right triangle are given. Find the perimeter and area of the triangle.

Hypotenuse: 34 ft.; Leg: 16 ft.

$$34^2 = 16^2 + h^2 \quad 30 \quad h$$

$$h = 30$$

$$P = 30 + 34 + 16 = 80 \text{ ft}$$

$$A = \frac{16 \cdot 30}{2} = 240 \text{ ft}^2$$

Missing Lengths

Find the value of x .

$$A = 36 \text{ in.}^2$$

$$36 = \frac{12 \cdot x}{2}$$

$$36 = 6x$$

$$x = 6 \text{ in.}$$

Find the height and area of the polygon.

$$23 \cdot \cos 30 = \frac{h}{23} \cdot 23$$

$$\underline{h = 19.9 \text{ in.}}$$

$$A = 25 \cdot 19.9$$

$$\underline{A = 498 \text{ in.}^2}$$

Area of a Region

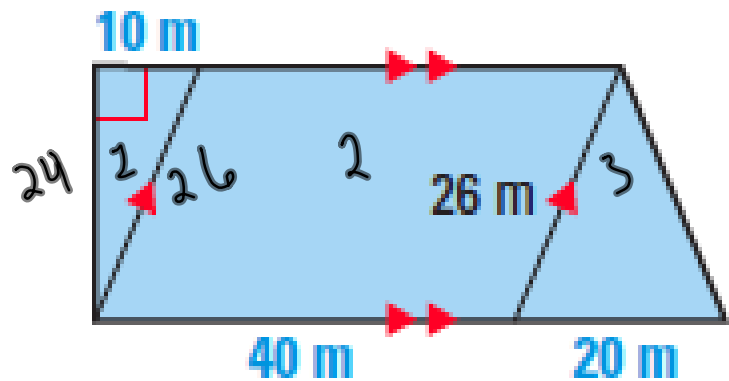

Find the area of the shaded region.

$$A = 64 \text{ in}^2$$

$$A = \frac{8 \cdot 3}{2} = 12 \text{ in}^2$$

$$64 - 12 = 52 \text{ in}^2$$

$$26^2 = 10^2 + h^2$$

$$h = 24$$

$$A_1 = \frac{10 \cdot 24}{2} = 120 \text{ m}^2$$

$$A_2 = 40 \cdot 24 = 960 \text{ m}^2$$

$$A_3 = \frac{20 \cdot 24}{2} = 240 \text{ m}^2$$

$$1320 \text{ m}^2$$
