

## No Bellwork 12/07/2011

Determine if the two triangles are similar. If they are, write a similarity statement.

1.

2.

# Geometry

## 6.5 Prove Triangles Similar by SSS and SAS

Standard(s): 3,7

### Vocabulary:

#### THEOREM

*For Your Notebook*

#### THEOREM 6.3 Side-Angle-Side (SAS) Similarity Theorem

If an angle of one triangle is congruent to an angle of a second triangle and the lengths of the sides including these angles are proportional, then the triangles are similar.

If  $\angle X \cong \angle M$  and  $\frac{ZX}{PM} = \frac{XY}{MN}$ , then  $\triangle XYZ \sim \triangle MNP$ .

*Proof:* Ex. 37, p. 395

#### THEOREM

*For Your Notebook*

#### THEOREM 6.2 Side-Side-Side (SSS) Similarity Theorem

If the corresponding side lengths of two triangles are proportional, then the triangles are similar.

If  $\frac{AB}{RS} = \frac{BC}{ST} = \frac{CA}{TR}$ , then  $\triangle ABC \sim \triangle RST$ .

*Proof:* p. 389

#### CONCEPT SUMMARY

*For Your Notebook*

#### Triangle Similarity Postulate and Theorems

##### AA Similarity Postulate

If  $\angle A \cong \angle D$  and  $\angle B \cong \angle E$ , then  $\triangle ABC \sim \triangle DEF$ .

##### SSS Similarity Theorem

If  $\frac{AB}{DE} = \frac{BC}{EF} = \frac{AC}{DF}$  then  $\triangle ABC \sim \triangle DEF$ .

##### SAS Similarity Theorem

If  $\angle A \cong \angle D$  and  $\frac{AB}{DE} = \frac{AC}{DF}$  then  $\triangle ABC \sim \triangle DEF$ .

## Use the SSS Similarity Theorem

Is either  $\triangle PQR$  or  $\triangle STU$  similar to  $\triangle XYZ$ ?

$$\begin{array}{l} \frac{15}{25} \\ \frac{3}{5} \end{array} \quad \begin{array}{l} \frac{20}{15} \\ \frac{4}{3} \end{array} \quad \times$$

$\checkmark PQR \sim XYZ?$   
 $\times STU \sim XYZ?$

\*Do the ratios of all three pairs of corresponding sides have to be equal if the three triangles are similar?

## Use the SSS Similarity Theorem

Find the value of  $x$  that makes  $\triangle XYZ \sim \triangle PQR$ .

$$\frac{20}{30} = \frac{(x+6)}{21}$$

$$42 = 3x + 18$$

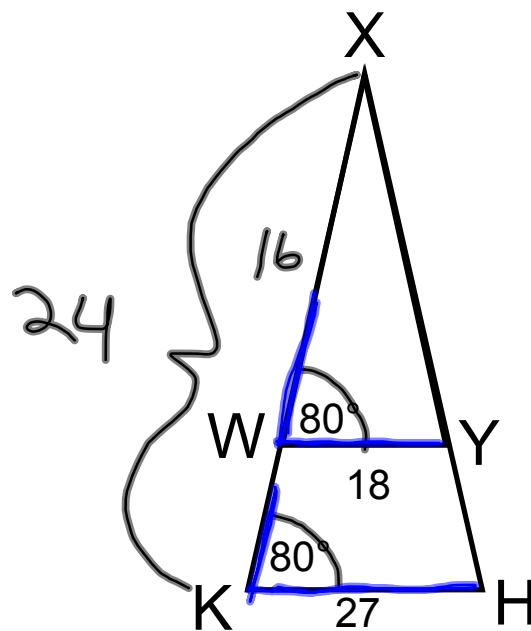

$$3x = 24$$

$$x = 8$$

**\*How is the scale factor used to find  $x$ ?**

## Use the SAS Similarity Theorem

You enlarge  $\triangle XYW$  to  $\triangle XHK$  as shown. Is  $\triangle XYW$  similar to  $\triangle XHK$ ?

$$\frac{18}{27} = \frac{16}{24} = \frac{2}{3} \quad \checkmark$$

SAS  $\sim$  thm.

$$XW=16, XK=24$$

## Choose a Method

Tell what method you would use to show that the triangles are similar.

SSS  $\sim$  thm.  
because we have  
no  $\angle$  info.
